About Me

Full Stack Software Engineer with close to 2 years of professional experience building enterprise-grade applications in Java (Spring Boot) and TypeScript (React). Hands-on across the full delivery lifecycle – from REST API design and frontend development to container deployments and production monitoring. NUS Computer Science graduate with a strong foundation in software engineering principles, distributed systems, and agile development practices. Please feel free to check out my Portfolio Webpage created using React, the link is provided in the header.

Technical Skills

Languages: Java, Typescript, Javascript, Python, C, C++, SQL

Frontend: React, Redux, Formik, MUI (Material UI), i18next, Playwright and vitest browser testing

Backend: Spring Boot, Spring Security, REST APIs, Micro-services

Databases: Oracle, H2

Devops and Infrastructure: Kubernetes, Helm, Octopus Deploy, Grafana, Flowable

Other: Git, Agile/Scrum, role-based access control, audit logging

Experience

FULLSTACK DEVELOPER, JULIUS BÄR, SINGAPORE – JAN 2025-PRESENT

- Develop and maintain the Client Lifecycle Management (CLM) platform, a mission-critical enterprise application supporting global private banking operations.
- Build and expose Spring Boot REST APIs with Spring Security role-based access control and structured audit logging, ensuring compliance with strict financial regulatory requirements.
- Implement dynamic React/TypeScript frontend components using Redux for state management, Formik for complex form handling, and MUI for UI consistency across the platform.
- Integrate external regulatory data services (e.g. MHA country coverage API) with environment-aware logic to handle dev, UAT, and production data flows.
- Manage application deployments via Octopus Deploy and Helm charts on Kubernetes, and monitor service health and logs through Grafana.
- Collaborate in cross-functional squads using Agile methodology, contributing to code reviews and maintaining shared component libraries.

DEVOPS ENGINEER INTERN, CENTRAL PROVIDENT FUND BOARD – JAN - JUL 2023

- Contributed to the development and enhancement of internal micro-services used across CPF's operational workflows.

- Worked within a DevOps team to improve CI/CD pipelines and streamline application delivery.
- Worked on Python scripts to improve CI/CD automation workflows.
- Collaborated with fellow interns on multi-workstream projects, coordinating deliverables under tight timelines.

COMPANY QUARTERMASTER (FULL-TIME NATIONAL SERVICE) – JAN 2018-NOV 2019

- Managed full logistics operations for TUAV Company, 11C4I Battalion; volunteered for battalion-level events in a leadership capacity.
- Received an outstanding soldier award during In Camp Training (Reservist) for proactively carrying out duties above and beyond the requirements.

Education

- National University of Singapore, Singapore – Bachelor of Computing (Computer Science) Honours (Merit), 2024
- Relevant coursework: Software Engineering, Data Structures & Algorithms, Computer Networking, Artificial Intelligence & Machine Learning, Computer Graphics, Game Development.
- Proficient in Python, Java, JavaScript/TypeScript, C, C++.

Projects and Activities

PRESIDENT OF THRESHOLD, TEMASEK HALL BAND CCA – AUG 2021-MAY 2022

- Organised frequent and varied activities and events for the CCA.
- Served as a liaison to the Hall Administration and cooperated extensively to improve the overall well-being and skills of the CCA members.
- Participated in other social hall activities and gatherings.

HACK N ROLL 2022

- Built a Telegram Bot in a team of 4 to connect socially isolated individuals, providing a platform for anonymous community interaction and peer support.

GLOBAL GAME JAM 2022

- Developed a game with a 5-person team, contributed to both the codebase and an original background music soundtrack composition.

PERSONAL CODING PROJECTS

- Developed a simple music theory game for younger students to practice their music theory knowledge across a range of grades with different difficulty levels. The link is available in the header. I will also be using that link to periodically add updates to showcase any new skills I have learned in my current company.
- Developed a simple mock payment application as part of a team of 3, using React for the UI and Java SpringBoot for the backend.
